## Guide: Using the Electronic Journals Library (EZB) off campus

The Electronic Journals Library (EZB) is a service for the effective use of scientific full-text journals on the Internet. It offers fast, structured and standardized access to scientific full-text journals. Important: In the EZB you search for a journal title - not for articles in journals.

The access options to full-text articles are indicated by different colored traffic light symbols depending on the institution. As a member of the HFT you can authenticate yourself via Shibboleth to use the EZB off campus. If you would like to access the EZB via the DBIS information system, proceed as follows:

1. **Step:** Search for EZB in DBIS and select the EZB link from the database list.

2. **Step:** Click on "Recherche starten".

3. **Step:** You are now on the EZB website. At the top right you can still see the logo of the University of Regensburg. This means that you do not yet have access to the licensed content of the HFT. The traffic light system does not yet show access for HFT users.
