Content

You would like to experience project management in an international setting? You would like to work in international groups? Then join our workshop this semester and learn hands on how to make international project work successful!

International project management asks for far more skills than project management alone. Due to diverse cultural backgrounds, a variety of additional tasks need to be considered, which will be presented, discussed and implemented in this workshop.

Learning outcomes

After completion of the workshop participants will be able to

- identify fundamental project management principles
- apply a cultural world map for project management
- implement pragmatic methods and tools for managing international projects
- contrast the impact of culture for international projects
- execute transfer into your projects

After completion of the course, students will obtain a certificate.
