COURSE

The International Project Management Master's program is for architects, engineers, and construction professionals aiming to enhance their project management skills. It covers trends like BIM, Agile, Lean Management, and sustainability. The program offers two specializations: "International Building Project Management (IBPM)" and "International Infrastructure Technology & Management (IITM)". A unique double degree option with Edinburgh Napier University (M.Eng.+MBA) includes a semester in United Kingdom and a joint master thesis, strengthening leadership skills.

PROGRAMME STRUCTURE

Summer Term

- Technical Basics (IBPM/IITM)*
- Management Basics
- Effective People Management
- Project Management (IBPM/IITM)*

Winter Term

- Managing Real Estate/Infrastructure (IBPM/IITM)*
- Managing Business & Finance
- Managing Information
- International Workshops

Semester 3

- Master's thesis

*Each student has to choose one field of specialisation: International Building Project Management (IBPM) or International Infrastructure Technology & Management (IITM).
